Recommended image size for PAN's Pagan Events pages is 1230 x 200 pixels.

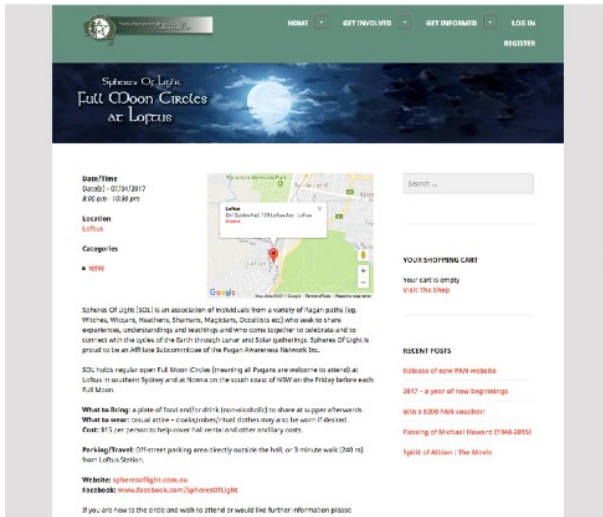

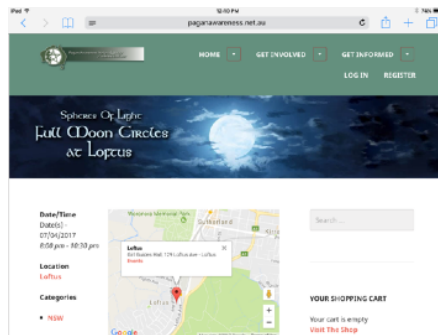

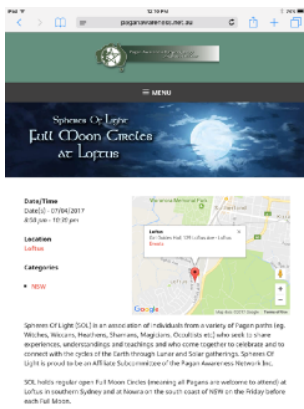

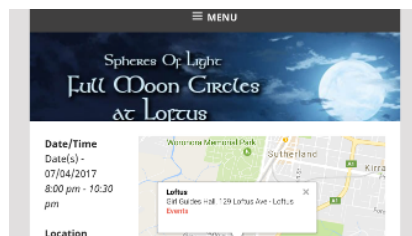

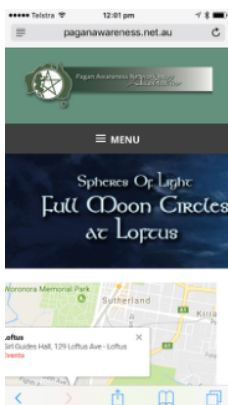

However, the amount of image viewable varies with screen size on different devices.

<< Desktop view showing maximum page width.

When the page is viewed on smaller laptops or other mobile devices the image is cropped from the right-hand side and from below, so it's advisable to keep the most important information (eg. event title, logo or other main focal point) on the far left side of your image. See examples below.

<< Tablet — "portrait" and "landscape" orientation.

<< Phone — "portrait" and "landscape" views.

Use the diagram below as a guide to best placement of the most important elements of your event image.
